

7 November 1983

MEMORANDUM FOR: Director, Office of Global Issues

FROM: Executive Assistant to the DDCI

The DDCI would appreciate your preparing a paper for him discussing strategically important countries or areas where the Soviets and/or their allies have established a presence, through military aid, military advisors, or what have you. These areas could be strategically important either because of their geographical location or because of the strategic raw materials they produce. You should aim for about 25 November.
